

Dear Valued Customers,

We are excited to share some exciting developments at TIBCON Capacitors with you.

Firstly, we have introduced a line of high-performance capacitors designed specifically for Railway Electric Locomotives. Our capacitors are used to filter out harmonic frequencies generated by the locomotive's electrical systems, such as its traction motor drives, power inverters, auxiliary converters, and other electronic equipment.

In addition, we are thrilled to announce our new WM Capacitors with S3 technology. These capacitors are a reliable and high-performance choice for use in washing machines. They provide efficient and smooth operation even in demanding conditions, and can help extend the lifespan of the washing machine motor.

We are proud to have recently acquired several state-of-the-art manufacturing machines, allowing us to produce capacitors at a faster rate and with greater precision. This means that we can offer our customers even higher-quality products at competitive prices.

To further enhance our customer service, we are in the process of creating a dedicated customer support department. The department's function will be to communicate transactional details related to dispatch schedules, delivery, and transport details of your orders, keep track of timely production of customer orders, and effectively address your concerns and feedback.

Finally, we are excited to welcome two new members to our sales team. Mohammad Shariq, our General Manager of Business Development, and Sriram Vushakoyala, our AGM Business Development. Both bring a wealth of experience and expertise to our company, and we are confident that they will provide our customers with the best possible service.

At TIBCON Capacitors, we serve international markets with high-quality capacitors that meet the diverse needs of various industries. We have a wide range of capacitors, including Power Electronic Capacitors, Power Factor Correction Capacitors, Motor start/run capacitors, metalized polypropylene films, and many others.

Our commitment to quality and customer satisfaction has helped us establish a strong presence in international markets. With a focus on innovation and continuous improvement, we are well-positioned across Asia, Africa, Australia, Europe, and America. Our export business reaches 28 countries, including UAE, Saudi Arabia, Qatar, Bahrain, Turkey, USA, Iran, Bangladesh, Sri Lanka, Spain, Vietnam, Nepal, Mexico, Egypt, and many more.

We take quality seriously at TIBCON Capacitors. Our manufacturing process uses the latest technology and equipment, and we have a strict quality control system in place. Our experienced engineers continuously monitor and improve our production processes to eliminate any potential quality issues. We work closely with our suppliers to source only the best quality raw materials. Customer feedback is essential to us, and we use it to make necessary improvements to our products.

Thank you for choosing TIBCON Capacitors. We look forward to continuing to work with you and providing you with the highest-quality capacitors on the market.

Sincerely,

Tibrewala Electronics Limited.
